

Demo Account Credentials

Three shared accounts for visitors who want to try the platform without registering. Share these credentials privately — they do not appear anywhere in the app's UI.

How to use

Go to <https://empower-vocabulary-practice.web.app>, click **Sign In**, enter one of the email + password pairs below, and click **Sign In**.

Credentials

Account	Demo Account 1
Email	demo1@stu.fsm.edu.tr
Password	EmpowerDemo2025!
URL	https://empower-vocabulary-practice.web.app
Account	Demo Account 2
Email	demo2@stu.fsm.edu.tr
Password	EmpowerDemo2025!
URL	https://empower-vocabulary-practice.web.app
Account	Demo Account 3
Email	demo3@stu.fsm.edu.tr
Password	EmpowerDemo2025!
URL	https://empower-vocabulary-practice.web.app

What demo users can and cannot do

Action	Demo user
Sign in and reach the student dashboard	Yes
Open the hub and browse all six skills	Yes
Play Vocabulary activities	Yes — but score is NOT saved
Read Reading exam texts and questions	Yes (read-only)
Listen to Listening exam audio	Yes (read-only)
Submit a Reading / Listening answer	No — blocked
Join a classroom session by code	Yes — appears in roster

Action	Demo user
Submit a classroom answer	No — blocked
See teacher assignments list	Yes (read-only)
Submit an assignment completion	No — blocked
Open the teacher dashboard	No — blocked
Be promoted to teacher	No — permanent restriction

Important

These credentials are shared. Any progress one visitor makes appears to the next visitor who logs in to the same account. Demo accounts do not save sessions to the database, so this is mostly cosmetic — streaks reset on refresh.

Sharing checklist

- Do NOT email these credentials to anyone outside FSMVU.
- Do NOT put them in any public document or website.
- DO share them privately with prospective students, parents, visiting researchers, or anyone who needs a brief tour of the platform.
- Print this PDF if it is easier to hand over in person — but shred copies once obsolete.

Rotating passwords

To change the passwords for these accounts:

- Open `E:\vocab-trainer\y\tools\create-demo-accounts.js`.
- Edit the password fields in the `DEMO_ACCOUNTS` list at the top of the file.
- Add `rotate: true` to each entry whose password changed.
- Run `node tools/create-demo-accounts.js` from the `y` folder.
- Edit `DEMO_ACCOUNTS` in `build_pdfs.py` to match, then run `python build_pdfs.py` to regenerate this PDF.

Deleting demo accounts

Go to Firebase Console → Authentication → Users → search for the demo email → delete. Also delete the matching Firestore `users/{uid}` doc. The accounts will then no longer work.
